

DIARY NOTES

DD/S

20 April 1971

\*BPR Property: Mr. Lawrence Casazza, Deputy Director of Administration, Federal Highway Administration, telephoned 20 April to advise his understanding that the President's Board of Review had rejected a last appeal from the Department of Transportation against the finding that some 330 acres of Federal Highway land next to us is surplus to that organization's needs. Mr. Casazza has not seen the letter from Mr. Levin, Chairman of the President's Board, to Under Secretary Beggs which contains this decision. He does not believe that there is any further appeal open to DOT and expects that FHWA will now undertake a survey of the property to determine what land is to be retained including connections to highways for access and egress. He communicated that Federal Highway would have some 30-35 acres left, land presently utilized for their buildings, parking lots and test facilities. I mentioned this to Mr. Blake.
